Creating a Training Program from Scratch: What it Takes!

Do you have a need to develop in-house training programs?

Do you want a model to follow when designing a program?

This hands-on workshop will provide you with several ideas, tools, templates, and techniques for creating a specific and effective training program from start to end. The program will provide you with the basic fundamentals of design and a step by step process to help you through each phase of the design process.

This session can be tailored to help you create a program from scratch (never trained before) or to evaluate your current training programs to identify any gaps in content, application, etc.

Workshop Objectives:

- Plan and analyze the learners and course content
- Identify how to work with a subject matter expert
- Create a task listing and write outcome based course objectives
- Develop course materials and apply the principles of adult learning
- Validate and evaluate course effectiveness

Target Audience:

- Individuals who are responsible for designing internal training programs, those who revise current training programs, and for those who prepare presentations

Course Length:

- 1 – 2 days
